- ❑ All visits from across continuum of care
- ❑ No paper charts
- ❑ All physicians using CPOE
- ❑ EMR available at network locations & by remote access

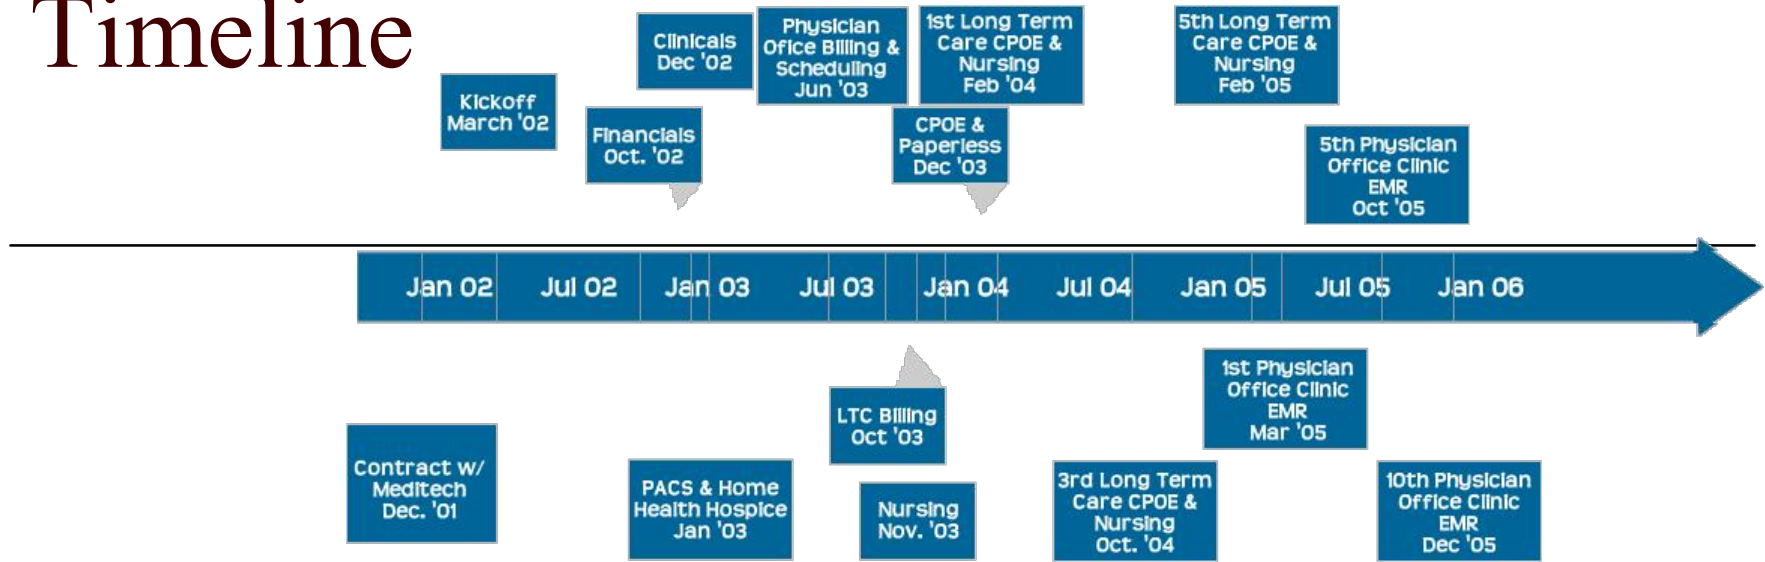

# Statistics

---

- ❑ One data center serves entire system
- ❑ Wireless, LAN, MAN & WAN & now SAN
- ❑ Integration strategy
  - Meditech & partners LSS & PtCT
  - Quick Study Radiology PACS
  - Perceptive Software document management
- ❑ 70,000 patients in the EMR
- ❑ Each patient has 7 visits on average

# Timeline

- ❑ Identify need/organizational strategic planning
- ❑ IS Strategic Planning
- ❑ Software selection
- ❑ Implementation planning
- ❑ Implementation

- Enable a patient to enter anywhere into the continuum of care and have a personal identity that is maintained across that continuum

- Physicians and other caregivers will have access to all of that patient's medical information within the healthcare continuum

# Integrating as far and wide as possible

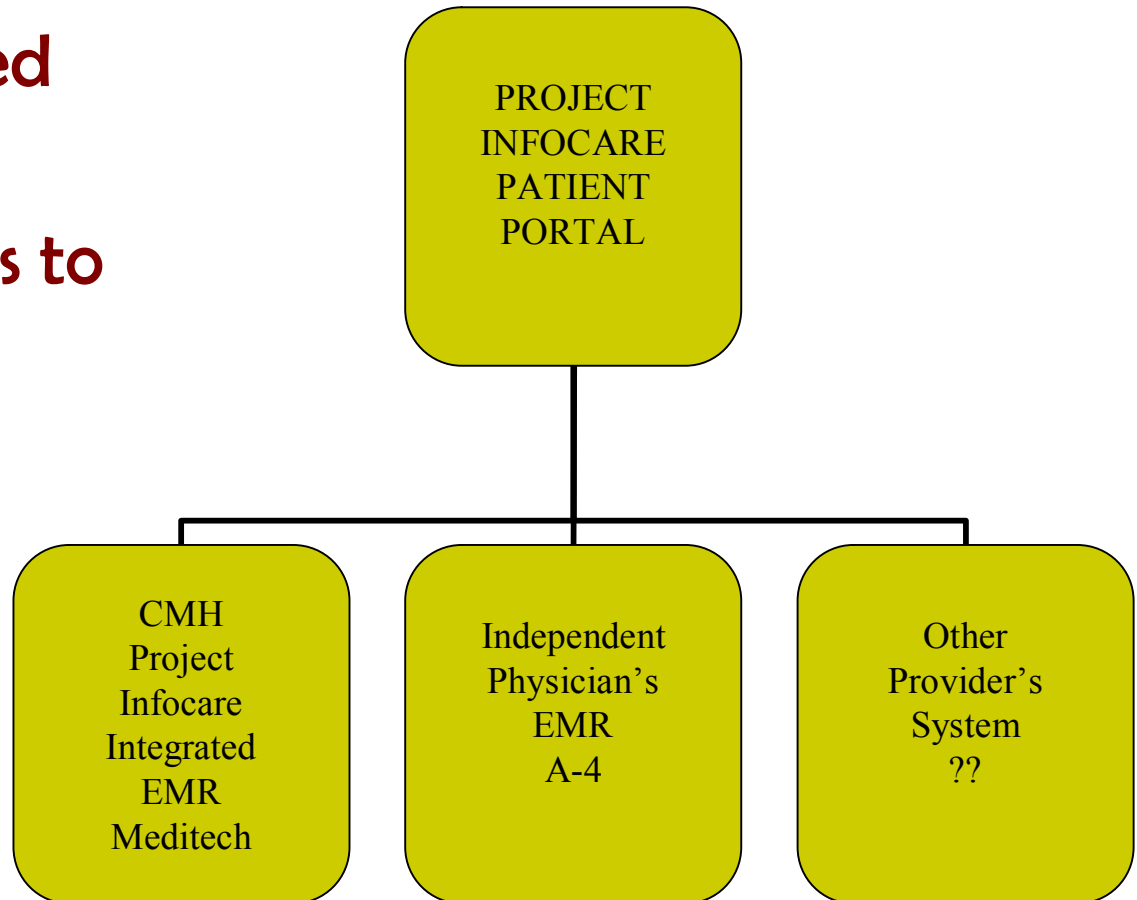

---

- Financially efficient
- Clinically effective
  
- Incorporated into existing agreements & contracts
  
- Citizens Memorial Hospital
- Citizens Memorial Healthcare Foundation
- Independent physicians (all viewing & order entry, some using in-office)
- Other hospitals & facilities?
- Health departments?
  
- And, then what? . . .

# And, then what?

---

- ❑ Patient-centered portal
- ❑ Real time access to information

# Continuum of DR Models for Interoperability

---

- ☐ Centralized
- ☐ Hybrid
- ☐ Decentralized

# Centralized

# Hybrid

Multiple CDRs

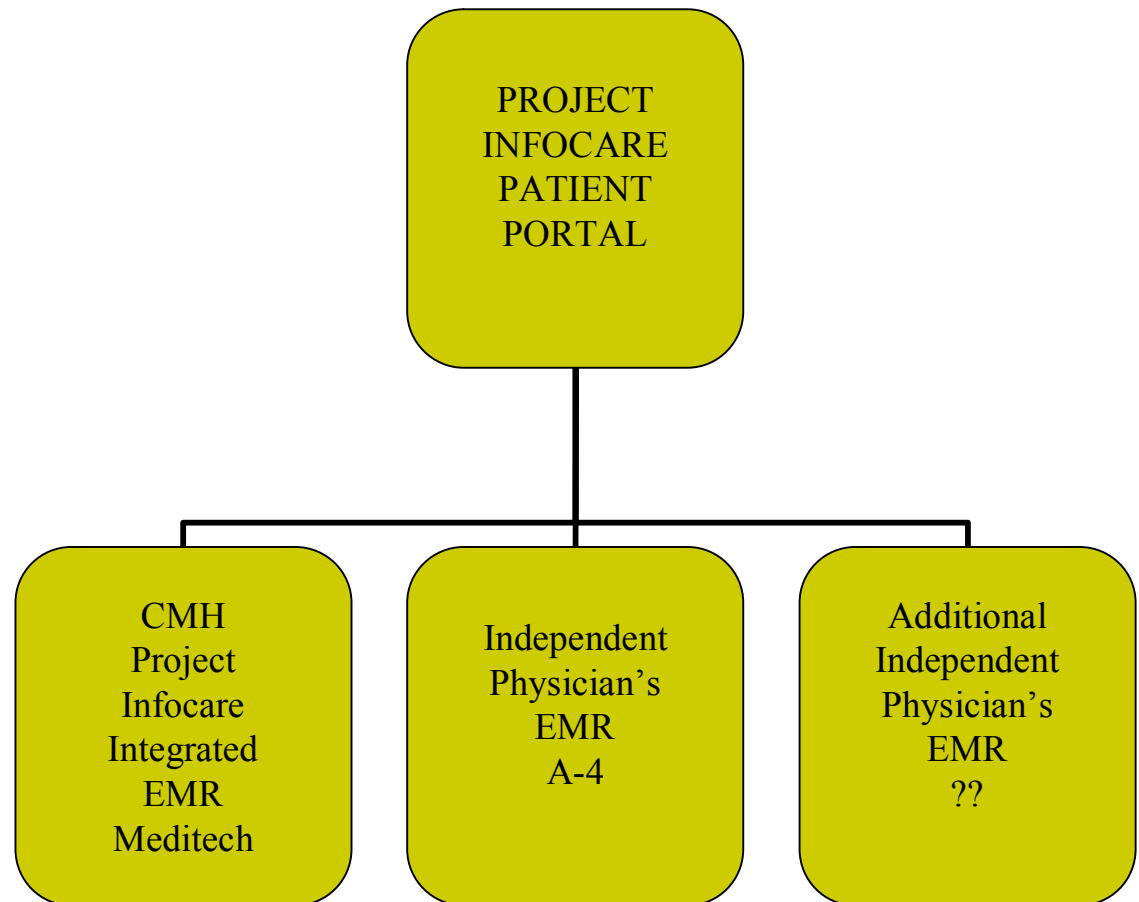

# Decentralized

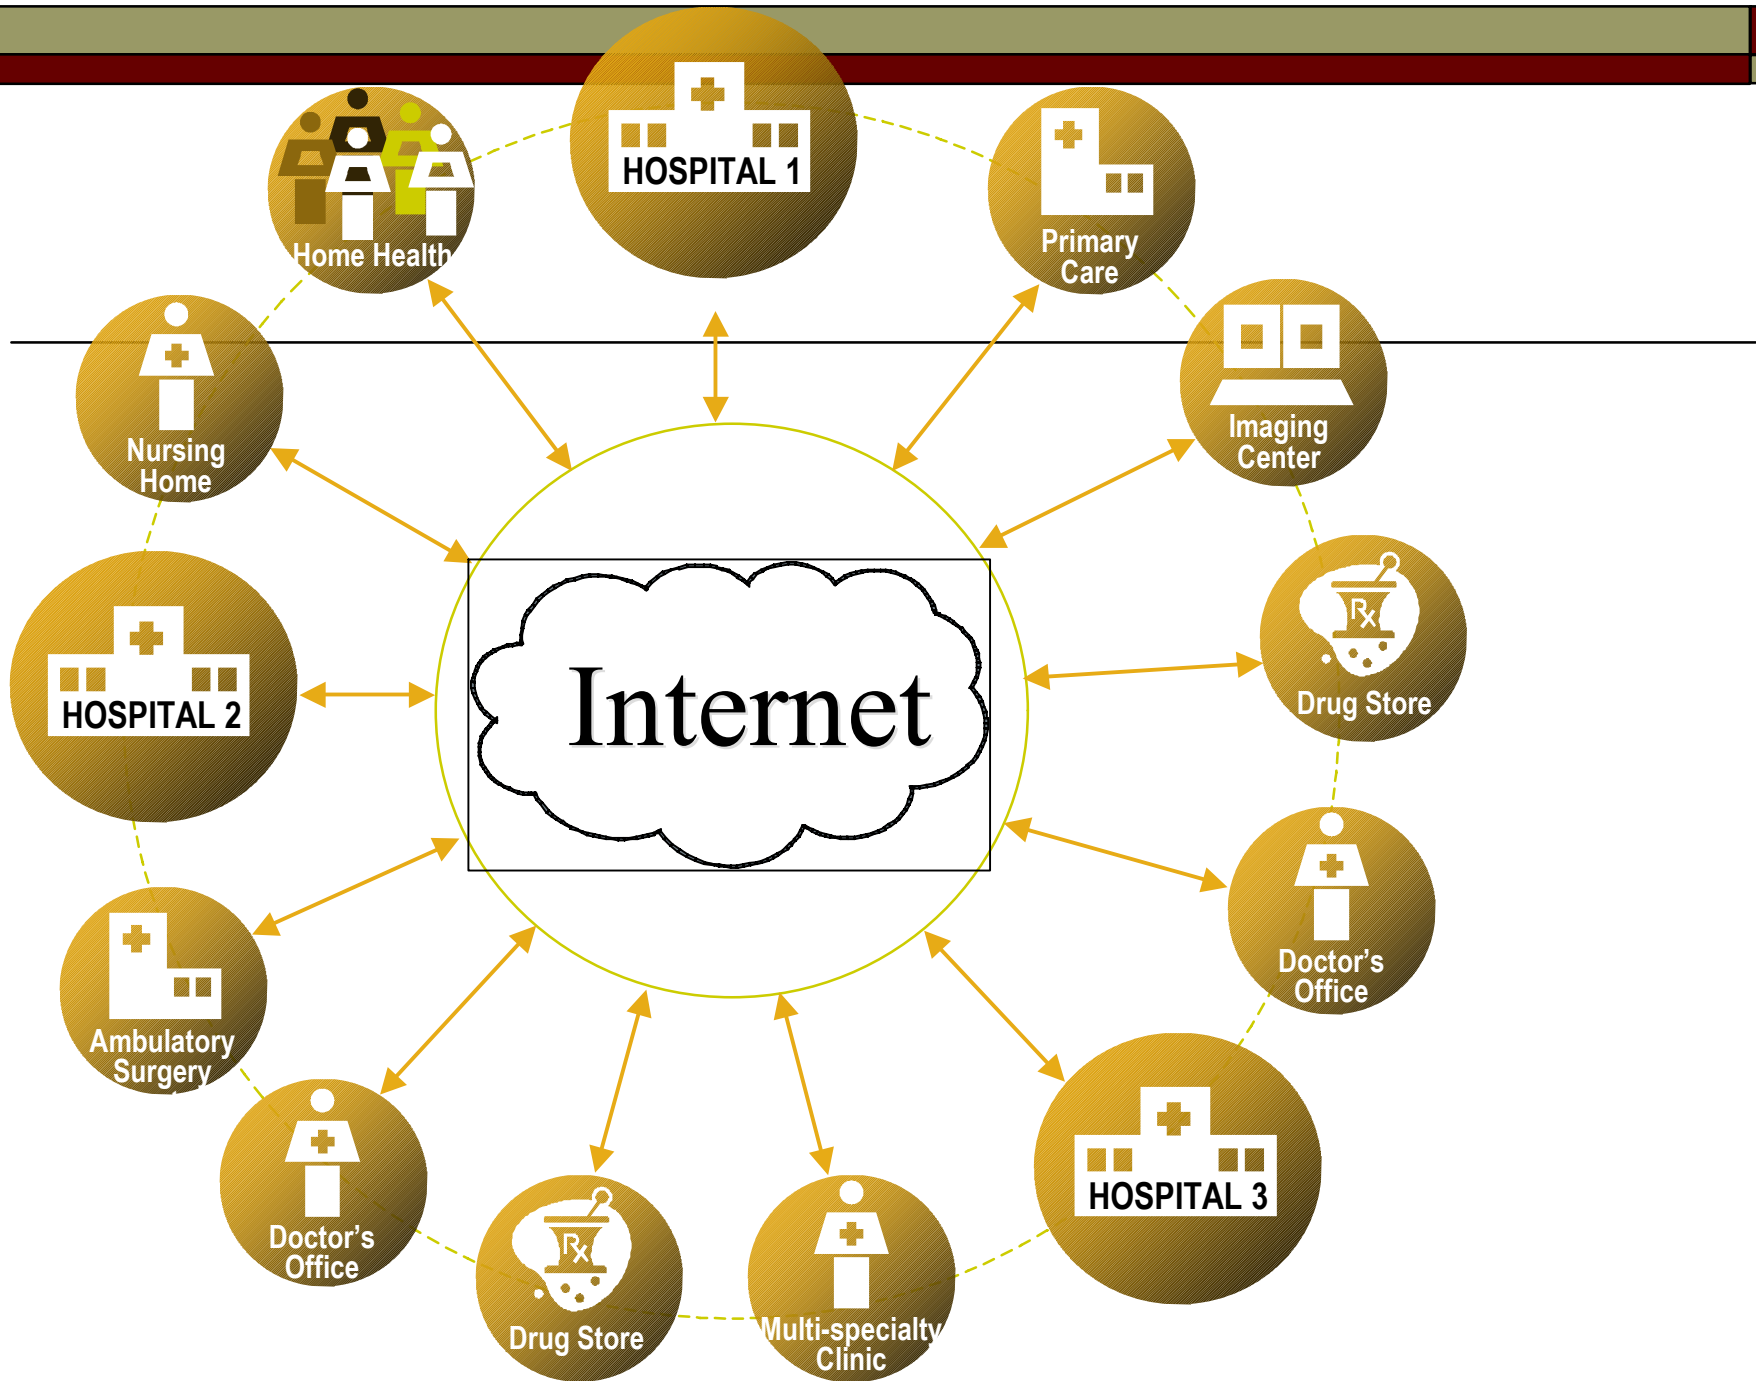

---

# Decentralized or Hybrid Model Applied in a Patient-Centered Approach

- ❑ Patient-centered portal
- ❑ Virtual presentation of real time information
- ❑ Directly from source systems or system DR published to the web
- ❑ GoogleHealth Model

# Why a (patient-centered, virtual) approach?

---

- ❑ Scalable
- ❑ Solves the out-of-region problem
  - Second opinion, center of excellence treatment
  - Moving
- ❑ Leaves the responsibility for accurate data with the provider of the care (bank model)
- ❑ No massive overhead expense to establish or maintain
- ❑ Commercially sustainable
- ❑ Patients have control (mitigates HIPAA issues)
- ❑ Could even work without internet-savvy patients (give consent to provider to access information)
